

# BRAND STORY

What brought us here today will not get us swiftly and sustainably to tomorrow.

To accelerate human progress and move boldly towards a better future, we must redefine and reimagine human mobility.

At HORWIN, we see mobility as the way to move people from the present, into the future.

By redefining personal transport by developing sustainable EV technology which moves people further and faster, with less energy and zero emissions.

By redefining versatility by designing products which nimbly adapt to both road and trail.

Moving people fluidly between urban centres and the great outdoors — on a single charge.

Redefining safety and performance by engineering self-balancing technology which amplifies natural human ability.

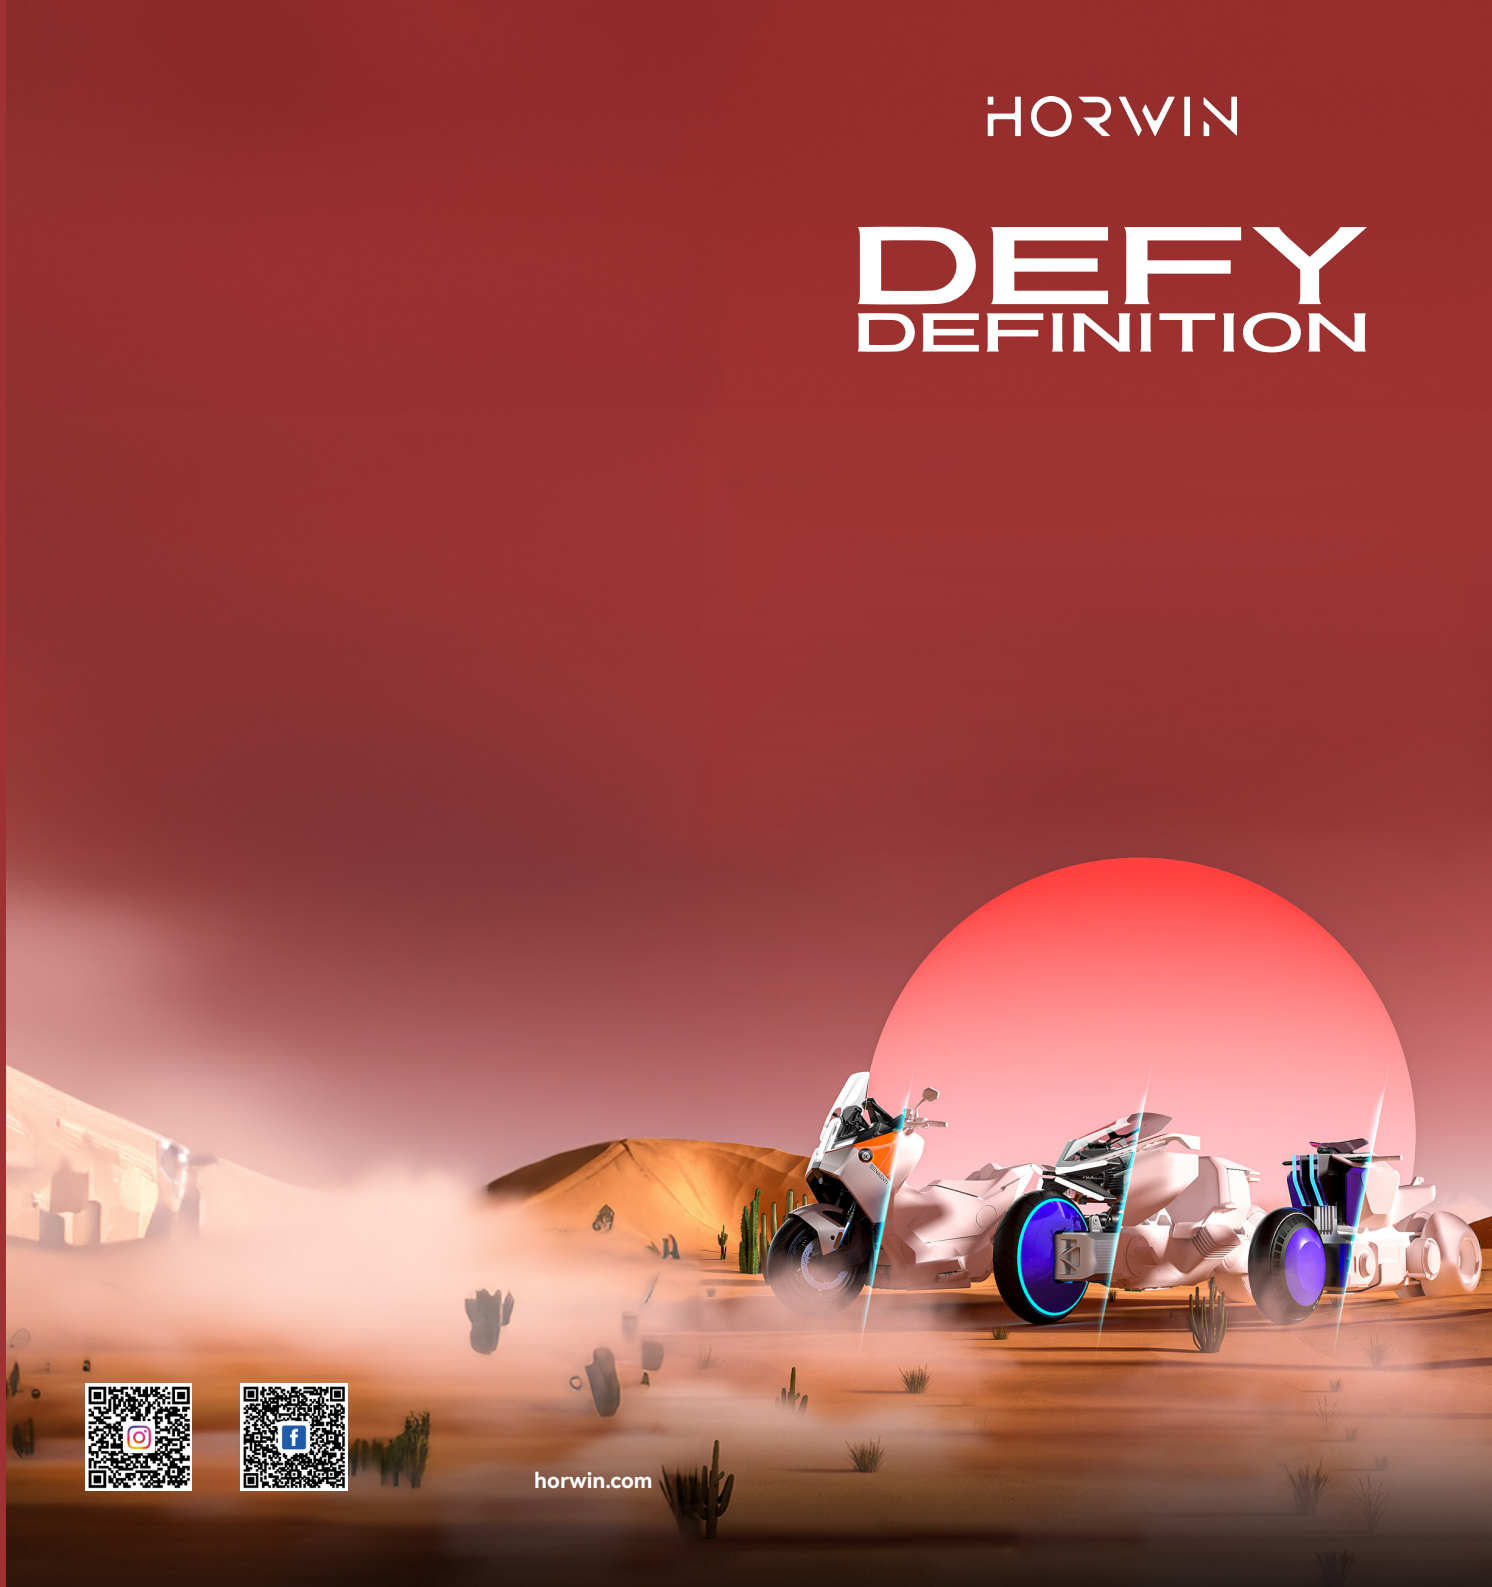

At HORWIN, we're defying the limits of today's mobility technology to help everyone reach the opportunities of tomorrow.

# SENMENTI 0

A masterpiece of future technological aesthetics, combining urban avant-garde design with advanced capabilities. High-performance, long-range, low weight: the SENMENTI 0 is a super-charging masterpiece, built to defy the 'impossible triangle.'

With an integrated intelligent chassis with IM technology, providing triple versatility. Experience the ultimate mobile power solution with 16.9kWh energy supply, and 2.2kW external power output – making it ideal for camping, outdoor activities, mobile work, filming, and various outdoor jobs.

**TOP SPEED**  
200 km/h

**MAX TORQUE**  
894 Nm

**RANGE**  
300 km

**BATTERY CAPACITY**  
16,9 kWh

**PEAK POWER**  
74 kw

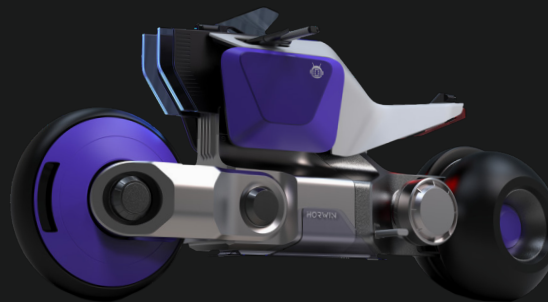

# SENMENTI 11

An urban exploration high-performance electric motorcycle, heralding HORWIN's aspirations towards a new kind of mobility. With a low-seat height and split rear-wheel for improved user comfort, and scene modular peripherals for diversity of travel scenario functions, the bike embraces both design and utility.

The portable external 2.2kw power source makes the bike ideal for camping, outdoor industrial work and sports. Combining intelligent hardware and superior driving safety capabilities, the SENMENTI 11 is a powerful vehicle designed for the future.

**FEATURES**

- Split rear wheel
- Can supply power to other products
- Optimized for adaptation through accessories
- Intelligent (safety) systems

# SENMENTI X

The SENMENTI X redefines the future, representing new possibilities for the electric vehicles. An electric super touring bike with a comfortable supercar seating position and electronically controlled steering, the SENMENTI X flies close to the ground – and accelerates 0–100km/h in less than 4 seconds. With fast charging in 30 minutes and boasting a 400km range, the SENMENTI X takes you further, faster.

**TOP SPEED**  
200 km/h

**SUPER CHARGE**  
30 min

**RANGE**  
400 km/h

**HIGH VOLTAGE PLATFORM**  
400 v

**PEAK POWER**  
74 kw

**0-100KM/H**  
≤4 s
